

### DESCRIPTION

The PSP Safety vest Orange 77-230 provides high visibility and complies with EN ISO 20471:2013, class 2.

The vest is made of 100% polyester and features reflective striping and Velcro closure. This makes the vest is very suitable for use in traffic and circumstances where high visibility is very important.

Article PSP 77-250 Safety vest RWS differs from article PSP 77-230, because it meets the guidelines of the Department of Public Works: the RWS standard. Thus, this vest meets the additional requirements on reflective clothing when performing work on public roads and railroads. Consider the positioning of the reflective stripes and use of color.

Both items comply with EN ISO 20471:2013, class 2, are available in different sizes, with Velcro closure and are washable at 40 degrees.

PSP 77-230 Safety vest Orange
